

Granite Gold Family History

Granite Gold Inc. is a family company with a long history of stone care expertise that spans three generations, dating back to the 1950s. Co-founders and cousins Lenny Sciarrino and Lenny Pellegrino grew up in the family business, manufacturing, installing and restoring stone surfaces in homes and businesses throughout Southern California.

Granite Gold Daily Cleaner

Looking for a granite cleaner to preserve and protect the beauty and durability of this natural stone? Our streak-free formula safely deep-cleans granite, marble, travertine and all other natural-stone and quartz surfaces. This **granite cleaner** quickly removes all types of spills and soils, and leaves a fresh citrus scent. The granite cleaner should be used regularly instead of typical, everyday household cleaning products, which can damage natural stone and lead to expensive repair or replacement.

- Safe on food-prep surfaces
- Non-toxic
- Non-acidic
- pH Balanced
- Biodegradable
- No phosphates or ammonia
- Also available in convenient, disposable wipes and a cost-saving refill

Granite Gold Sealer®

Sealing granite countertops and other natural-stone surfaces is made simple with Granite Gold Sealer – our easy-to-apply spray-and-wipe stone sealer that creates a barrier to protect all natural stone. Frequent use of the water-based stone sealer maintains maximum surface protection against staining, etching and soil build-up. Regularly check the integrity of the seal with an at-home water test. Pour water (about 3 inches in diameter) on the surface in several locations and let it sit for 30 minutes. If you see a dark mark or ring, the water is penetrating the stone and it's time to reseal.

- Safe on food-prep surfaces
- Non-toxic
- Non-acidic
- pH Balanced
- Biodegradable
- No phosphates or ammonia
